

2016 MORRISON FARM COMMUNITY GARDEN RULES

As a gardener, you must:

- use only fertilizers, insecticides, and fungicides listed by OMRI (Organic Materials Review Institute – www.omni.org) or WSDA (Washington State Department of Agriculture – www.agr.wa.gov), or organic home-made remedies
- use only biodegradable mulches (i.e., no black plastic) and use only non-toxic row covers (i.e., no tar paper)
- share with all gardeners any manure donated by MCI Concord
- abide by Acton Water District Watering Restrictions:
 - watering WITH HOSES on Tuesdays, Thursdays, and Saturdays ONLY.
 - watering with watering cans on any day.

There is no assurance that water will be available throughout the summer.

- deposit all garden debris in the areas provided, e.g., place compost and stones in “Compost” and “Stone” containers, respectively. There is no trash service provided—this is a carry-in / carry-out facility.
- keep all pathways clear for mowers. Do not put rocks, weed clumps, corn stalks, tools, chairs, or structures on mowed pathways.
- remove man-made materials: cages, stakes, fences, etc., by November 6, 2016. Do not remove wooden or metal plot boundary stakes.
- All materials and tools must be stored offsite during the off-season. If items are left behind they will be disposed of and your garden plot renewal may be denied.

You may not:

- use herbicides.
- extend your garden beyond your assigned plot boundaries. Any planting done in this manner will be removed.
- borrow privately-owned tools or hoses from other plots without the owner's permission.

Perennial plants are not advised; there is no assurance of having the same plot annually.

Dogs are not permitted inside the fenced garden area.
